

ALUMINIUM TRAYS

ALUMINIUM TRAYS FOR DRYING

rev. 0030.1811.82

■ Stainless steel trays

- No wood particles in the product
- Perfect mechanical strength
- Stackable and compatible with wooden and aluminium trays
- Produced in Italy in compliance with EU standards

ALUMINIUM TRAYS

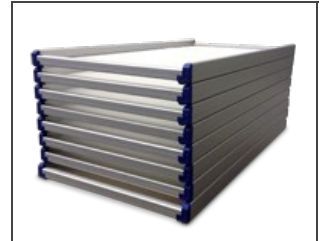

Stackable stainless steel tray for static dryers: aluminium profile structure, with polyester mesh. Available in two different models. Discover their characteristics.

MAIN TECHNICAL FEATURES:

- Round corner ends to avoid interruption during sliding
- The lower profile is shaped so as to simplify the placement during the phase of automatic stacking
- The internal metal parts of the tray in contact with the product have a reduced bearing surface
- The tray hasn't got openings or holes closed by plastic cups, which could allow the entry of damaging debris or the loss of movable parts
- Minimum rubbing of the aluminium parts, thanks to a special contact element
- Internal dimensions being equal, it enables to get 10 mm more of useful length and 5 mm more in width. This way, it is possible to stack up to 7 more trays per trolley
