

DIE WASHING MACHINE

EFFICIENT AND ECO-FRIENDLY FOR THE BEST WASH

rev. 001101.2405.44

■ Die washing machine

- A complete series of models, for small, medium and large pasta factories.
- Conceived for circular and linear dies
- They are managed by PLC for maximum simplicity

DIE WASHING MACHINE

A complete series of models, for small, medium and large pasta factories. Conceived for circular and linear dies, they are managed by PLC for maximum simplicity.

Main technical features:

- The pump ensures maximum washing pressure and the arm system distributes the jets evenly
- All the inserts are reached by the pressurised water, thanks to the movable arms and to the die rotation system
- The water is recovered and reused after the pasta residues are decanted and removed, collected in the specific container
